NEW SKIN TIGHTENING

THERMAGE® SKIN TIGHTENING | STARTING AT \$1995

By harnessing the unique power of radiofrequency energy, Thermage applies heat to deep layers of collagen and elastin while protecting the skin's surface. The immediate effect may be 'naturally refreshed' but over a period of 3-6 months, those existing collagen and elastin fibers are reformed into tighter, younger versions and new fibers are stimulated for an effective turning back of 'the clocks.' Safe for the face, eyes and body.

ULTHERAPY® | STARTING AT \$895

Where surgery was once your only choice to lift lax skin, Ultherapy® introduces an effective, non-invasive alternative. Harnessing the power of ultrasonic energy, Ultherapy® reaches deeply into the dermis to heat and contract collagen. From a single treatment, skin lifts and firms for improved skin tone and youthful definition. Ultherapy is currently the only non-invasive device approved for lifting the neck, chin, jawline, cheeks, lids and brow.
